

Prof. Jean-Pierre Colinge received a BS degree in Philosophy, the Electrical Engineer degree, and the Ph.D. degree in Applied Sciences from the Université Catholique de Louvain, Louvain-la-Neuve, Belgium, in 1980, 1980, and 1984, respectively. He worked at the Centre National d'Etudes des Télécommunications (CNET), Meylan, France, at the Hewlett-Packard Laboratories, Palo Alto, USA, at IMEC, Leuven, Belgium, where he was involved in SOI technology for VLSI and special device applications. From 1991 to 1997 Dr. Colinge was professor at the Université Catholique de Louvain, leading a research team in the field of SOI technology for low-power, radiation-hard, high-temperature and RF applications as well as reduced-dimension devices (thin double-gate and quantum-wire MOSFETs). From 1997 to 2006 he was professor at the University of California at Davis, carrying on research on advanced multi-gate SOI MOS devices. He has been on the committee of several conferences, including IEDM and SSDM, has been General Chairman of the IEEE SOS/SOI Technology Conference in 1988, and is a Fellow of IEEE. He has published over 290 scientific papers and three books on the field of SOI as well as two books on semiconductor device physics. Prof. Colinge is currently working on the modeling, fabrication and characterization of advanced SOI MOS devices.
