

**Malgorzata Kujawska** Ph.D., Eng., D.Sc., Fellow of SPIE, professor of Applied Optics and Photonics at Warsaw University of Technology, head of Optical Engineering Division at Institute of Micromechanics and Photonics, recognized expert in full-field optical metrology and microsystems testing, image processing and hybrid experimental-numerical methods in mechanics and material engineering as well as multimedia technologies.

Visiting professor at: National Physical Laboratory, Oxford University (UK), University Franche-Comte, Ecole de Mines in St. Etienne (France), Alabama University in Huntsville, Optical Science Centre in Tucson (USA). The author of 15 monographs and book chapters on optical metrology and automatic fringe pattern analysis, author of more than 200 scientific publications in journals and conference proceedings.

She is also the Vice-President of the European Technology Platform Photonics 21, the Vice-President of ICO- the International Commission of Optics, co-coordinator of European Network of Excellence in Micro-Optics NEMO and the Past President of SPIE- the International Society for Optical Engineering.
