

Dr. Keishi Ohashi is currently Fellow, Nanoelectronics Research Laboratories in NEC Corporation, where he is conducting research activities on nanophotonics, carbon nanotube electronics, and nano sensors. He is also the Program Manager of LSI Chip Optical Interconnect Program in Semiconductor Leading Edge Technologies, Inc. He received the M.E. and Ph.D. degrees in Engineering from Nagoya University, Nagoya, Japan in 1979 and 2004, respectively. He joined NEC Corporation in 1979, where he had developed a variety of computer storage devices and their fabrication processes. After having engaged as the Senior Design Manager, he moved to NEC Research Laboratories in 1998, where he worked on spintronics, plasmonics, and electrochemistry for nanotechnologies. He had been a Guest Professor of Nagoya University from 2004 to 2005. He was also a Team Leader of Long-Wavelength Photon Sensing Lab. in The Institute of Physical & Chemical Res. (RIKEN). He received the JSAP (Japan Society of Applied Physics) Award for the Best Original Paper in 2006 and the Technical Award of The Surface Finishing Society of Japan in 2006.
