

Rahul Sarpeshkar obtained Bachelor's degrees in Electrical Engineering and Physics at MIT. After completing his PhD at Caltech, he joined Bell Labs as a member of the technical staff. Since 1999, he has been on the faculty of MIT's Electrical Engineering and Computer Science Department where he heads a research group on Analog VLSI and Biological Systems, and is currently an associate professor. He has received several awards including the Packard Fellow award given to outstanding young faculty, the ONR Young Investigator Award, the NSF Career Award, and the Junior Bose Award for Excellence in Teaching at MIT. He holds over twenty patents and has authored several publications including one that was featured on the cover of NATURE. His research interests include analog and mixed-signal VLSI, ultra low power circuits and systems, biologically inspired circuits and systems, biomedical systems, molecular biology, neuroscience, and control theory.
