

Huub Salemink is since end of 2004 fulltime professor in nanophotonics, chairman of the Kavli institute of nanoscience at Delft University of Technology and director of the Delft Research center at this university. He is a board member of the netherlands nanotechnology consortium NanoNed. Currently he holds a parttime professorship at TUE in nanophotonics. Preceding return to the Netherlands he was researcher at the IBM Zurich research laboratory in Switzerland, where he pioneered cross-sectional scanning tunnel microscopy and novel silicon-based photonic materials. Before departure to Zurich he was employee in the semiconductor laser department of Philips Research and worked on laser remote sensing at RIVM. His thesis and study in experimental solid state physics was at the Radboud university in Nijmegen. He has published approximately 120 reviewed papers and co-authored 10 IBM patents.
